DATA USE AGREEMENT

Introduction

This Data Use Agreement (“Agreement”) sets forth the terms and conditions governing the access, use, storage, and dissemination of the BDCXR-3257 chest radiography dataset. This Agreement is entered into by and between Dr. M R Khan Shishu Hospital & Institute of Child Health (hereinafter referred to as the “Data Provider”) and the authorized research team of Health Informatics Research Lab, Daffodil International University (hereinafter referred to as the “Data Recipient”), collectively referred to as the “Parties.” This Agreement is intended to ensure ethical compliance, patient confidentiality, data security, and responsible scientific use of the dataset.

Description of the Dataset

The dataset covered under this Agreement comprises a total of 3,257 clinically acquired pediatric chest radiographs categorized into three diagnostic classes: Normal (880 images), Bacterial Pneumonia (1,477 images), and Viral Pneumonia (900 images). The radiographs were collected from the Radiology & Imaging Department of Dr. M R Khan Shishu Hospital & Institute of Child Health, Dhaka, Bangladesh, as part of routine clinical care. All chest X-ray images were fully anonymized prior to inclusion in the dataset. No patient identifiers, demographic attributes, or metadata that could lead to patient re-identification are contained within the dataset.

Ethical Compliance and Confidentiality

The dataset was collected and processed in accordance with approved ethical standards under Institutional Review Board (IRB) approval number REC-FSIT-2025/No: 11928 from Daffodil International University. All reasonable measures were taken to ensure complete anonymization and protection of patient privacy. The Data Recipient agrees not to attempt to re-identify any individual, clinician, or institution associated with the dataset, either directly or indirectly, including through linkage with external data sources. The dataset is intended strictly for academic and research purposes and shall not be used for real-time clinical diagnosis, treatment planning, or direct patient care.

Purpose and Scope of Data Use

The dataset is provided exclusively for non-commercial academic research purposes, including scientific investigation, development and evaluation of machine learning and deep learning models, and scholarly dissemination through publications and conferences. Any use beyond the stated academic scope, including commercial exploitation, resale, licensing, or integration into clinical decision-support systems, is strictly prohibited without prior written authorization from the Data Provider.

Data Access, Storage, and Security

The Data Recipient agrees to implement appropriate technical and organizational safeguards to ensure secure storage and controlled access to the dataset. Access shall be limited to authorized research personnel directly involved in the approved study. The Data Recipient shall take all reasonable precautions to prevent unauthorized use, disclosure, duplication, or distribution of the dataset and shall maintain data security standards consistent with institutional and national regulations.

Restrictions on Redistribution and Sharing

The dataset shall not be redistributed, sublicensed, sold, or shared with any third party in whole or in part. Public release of the raw chest radiographs is strictly prohibited unless explicitly permitted in writing by the Data Provider. Derived analytical results, trained models, and aggregated research findings may be published or shared in academic forums, provided that no identifiable information is disclosed.

Publication, Citation, and Acknowledgment

Any publication, report, thesis, or presentation arising from the use of this dataset must appropriately acknowledge that the chest radiographs were collected from Dr. M R Khan Shishu Hospital & Institute of Child Health, Dhaka, Bangladesh, under approved ethical clearance REC-FSIT-2025/No: 11928. This Agreement does not imply or guarantee co-authorship unless separately agreed upon in writing by the Parties.

Intellectual Property Rights

Ownership of the original chest radiography dataset remains exclusively with Dr. M R Khan Shishu Hospital & Institute of Child Health. The Data Recipient retains intellectual property rights over analyses, algorithms, models, and research findings developed using the dataset. This Agreement does not grant any license or rights to distribute or commercialize the dataset itself.

Disclaimer of Warranty and Liability

The dataset is provided on an “as-is” basis without warranties of any kind, express or implied. The Data Provider makes no representations regarding the accuracy, completeness, or suitability of the dataset for any specific purpose. The Data Provider shall not be held liable for any direct, indirect, incidental, or consequential damages arising from the use or misuse of the dataset.
