

**Office of the Research Ethics Committee  
(Institutional Review Board), DIU**

Ref. No.: REC-FSIT-2025/No: 11928

Date: March 9, 2025

**To Whom It May Concern**

On March 2, 2025, a proposal for the research titled **“PneumoNet: A Deep Learning-Based Automated Pneumonia Detection System Using Chest X-ray Images”** was submitted to the Research Ethics Committee (REC) of the Faculty of Science and Information Technology (FSIT), Daffodil International University, for ethical approval. This study involves the use of chest X-ray images to develop an advanced AI-driven system for the automated detection and classification of pneumonia, aiming to enhance diagnostic accuracy and decision support in medical practice. After a thorough review process, the proposal was approved on **March 9, 2025**. The principal investigator, on behalf of the research team led by **Md. Hasan Imam Bijoy**, a faculty member of the Department of Computer Science and Engineering at Daffodil International University, ensured that the study adhered to strict ethical guidelines. The REC wants to ensure that the researcher, along with his team, followed the approved ethical procedures. These include a strong commitment to privacy and data protection by anonymizing and securely handling all medical data, obtaining proper consent from participants or their legal representatives before data collection, and ensuring that participation in the study was entirely voluntary, with the right to withdraw at any stage. Additionally, the study adheres to institutional, national, and international ethical guidelines for biomedical research involving human subjects.

Sincerely,

**Professor Dr. Md. Ismail Jabiullah**
